#### General data

#### Overview

· Allows the load to be switched off if necessary

• Can be used to output signals

Integrated auxiliary contacts

(1 NO + 1 NC)

Motor currents up to 820 A can be recorded and evaluated by a current measuring module, e.g. 3RB29 06-2BG1 (0.3 ... 3 A), in combination with a 3UF18 68-3GA00 (820 A / 1 A) series transformer.

<sup>2)</sup> The SIRIUS 3RN thermistor motor protection devices can be used to provide additional temperature-dependent protection.
